

Our Mission

To serve and support physicians, hospitals and other healthcare clients in providing high-quality patient care.

VISION

EmCare 2020 is the preferred provider of care to our patients and services to our clients. And this is founded on the fact that we are the preferred place to practice medicine or work in supporting and developing that practice. Our organization is one in which all of us get the tools we need, the training we want, the leadership we deserve and the ability to be heard. EmCare 2020 is changing health care.

Present State & Goals

These goals are no less important now but we have not executed well on all of them. There are fundamental organizational reasons for this. In addition, there are significant and pressing changes in our environment that are creating even more urgency for us to be able to execute well.
